WELCOME MESSAGE

Dear Colleagues,

On behalf of the Organizing Committee, we have great pleasure in inviting you to participate in the 15th Annual Conference of the Egyptian Society of Infection Control on the 1st-4th December, 2006 in Cairo, Egypt.

The conference is supported by the International Federation of Infection Control (IFIC). Also, this is a first time collaboration between the Egyptian Society of Infection Control (ESIC) and the Association for Professionals in Infection Control and Epidemiology (APIC) and the second collaboration with Eastern Mediterranean Region Nosocomial Infection Control (EMRNIC), under the theme:

"Infection Control: Everybody's Business"

In view of emerging infections which do not respect any borders or boundaries, strict and collaborated preventive measures should be carried out not only by health care providers, but also by all community members. Consequently, the spectrum of our conference has been extended to include different community members and stakeholders in addition to all healthcare workers so that they can participate in preventive measures in their community. Also, some hot topics will be tackled, basic and advanced knowledge of infection control will be provided by distinguished invited regional and international speakers.

Come and join us. We promise you that this meeting will be unique and scientifically rich by providing up-to-date knowledge. It will further help you develop a clear vision and overcome some of the obstacles usually met in countries with limited resources. In addition you will enjoy the hospitality of the Egyptians and the ancient history.

We are looking forward to seeing you in Cairo in December 2006.

Cordially yours

Prof. Ossama Rasslan
